

What is VIBRAFLOOR ?

Vibrafloor is a universal modular automatic reclaim system.

By simple vibratory action, the residual talus of bulk product is destabilized and evacuated.

Groups of vibrators are activated upon product detection, in an upward sequence, until complete emptying.

Our EXPERTISE

Vibrafloor has been deploying its systems for more than 40 years, providing full, automated and guaranteed cleaning.

Adapting to all sizes and shapes of silos, and a wide range of bulk products, Vibrafloor offers for multiple advantages in terms of safety, efficiency and reliability:

➤ Round, rectangular, concrete or steel silos, containers, domes, ships, railway cars, trucks

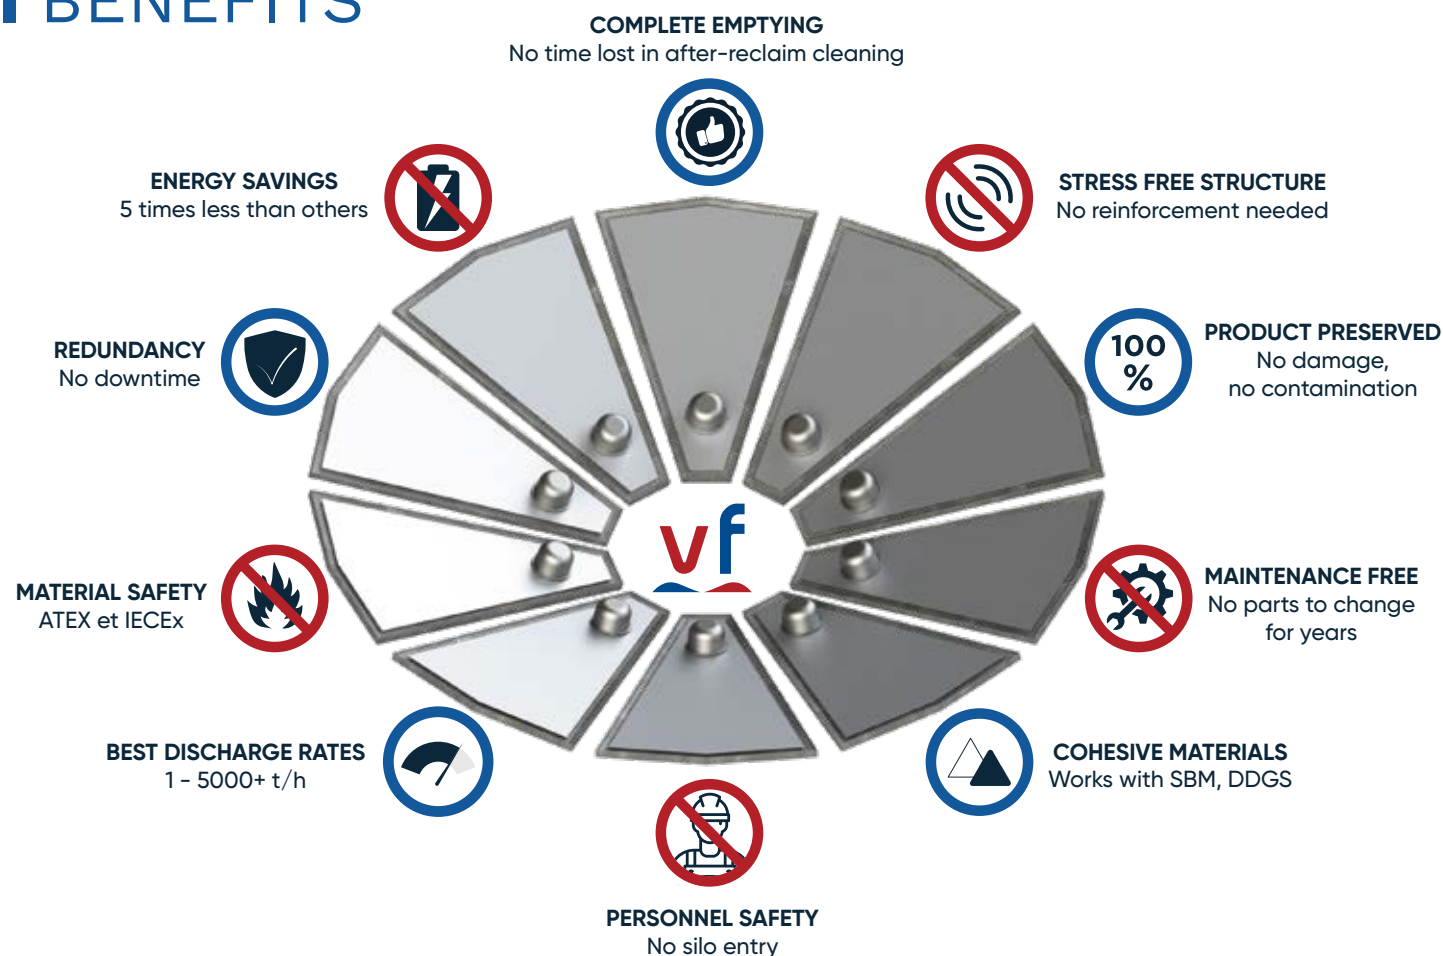

➤ Cereals, pellets and many other bulk products

Our system will be tailored to your specific needs.

Our VALUES

Customer service
Technology
Team spirit

A whole range of BENEFITS

THE IDEAL SOLUTION for silo reclaim

ANIMAL FEED CEREALS

Soybean meal, sugar, cereals, oilseeds, flour, dried distillers grains with solubles...

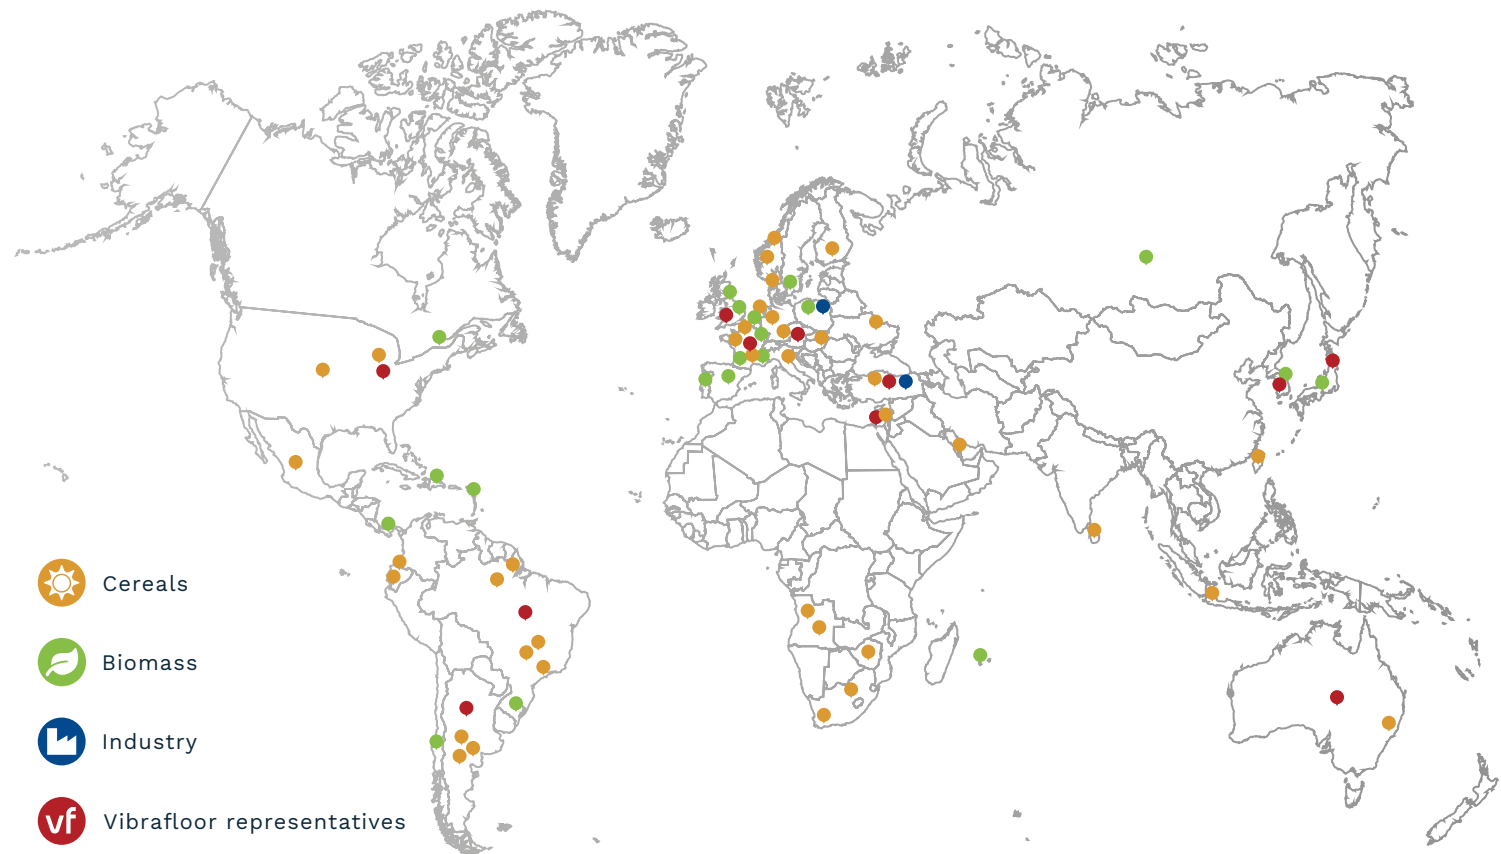

BIOMASS

Wood pellets & wood chips, sawdust, bagasse, sunflower hulls...

INDUSTRY

Fertilizers, fly ash, waste residue, plastics, minerals, cement...

UNIVERSAL RECLAIM SYSTEM

SIMPLE | SAFE | SMART

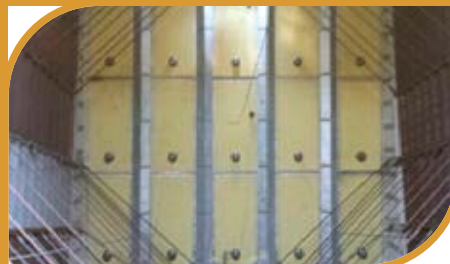

www.vibrafloor.com

BRAZIL (2021)
Cereals + Soybean meal
2 Silos Ø 30m

SOUTH AFRICA (2018)
Soybean meal
8 Silos Ø 11m

FRANCE (2014)
Cereals
8 Cells 9.2x9.2m

BELGIUM (2009)
Barley
20 Cells 9.2x9.2m

Automatic reclaim ANIMAL FEED CEREALS

The Vibrafloor system can be used with all types of cereals or animal feed :

- barley
- beet pulp
- corn
- fishmeal
- flour
- malt
- rapeseed
- rice
- soybean
- sugar
- wheat

Including cohesive products, guaranteeing a complete and efficient unloading.

- dried distillers grains with solubles
- rapeseed meal
- soybean meal
- sunflower cake

FRANCE OVERSEAS (2021)
Wood pellets
4 Domes Ø 50m

JAPAN (2020)
Wood pellets
8 Silos Ø 16.7m

SOUTH KOREA (2019)
Wood pellets
4 Silos Ø 26m

UNITED KINGDOM (2012)
Wood pellets
4 Domes Ø 63m

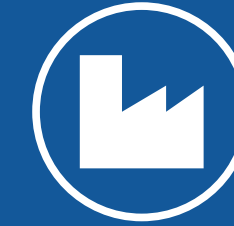

Automatic reclaim BIOMASS

The Vibrafloor system is efficient on a wide variety of biomass products for all storage sizes.

- bagasse
- rice husks
- sawdust
- straw pellets
- sunflower hull pellets
- sunflower shells
- wood chips
- wood pellets

Since 2012, Vibrafloor has been equipping many power generation sites and harbour terminals throughout the world, where discharge rate and product integrity are essential.

- Africa
- Asia
- Europe
- North America
- Oceania
- South America

Automatic reclaim INDUSTRY

FRANCE (2012)

2020
Polyhalite Test

Control room

Fatigue test bay

Vibrafloor has its own test facility in which many industrial products have been validated, such as :

- calcium carbonate
- cement
- fertilizers
- fly ash
- minerals
- plastics
- polyhalite
- sodium carbonate
- sulfur
- waste residue

Vibrafloor has extensively tested many customers' products and continues to do so, in order to guarantee its efficiency.

Vibrafloor provides an ongoing program of :

- Flow tests on a given product
- Durability tests to verify the longevity of each new module prototype
- Any tests with your product on demand
