AgriAsia Development Corp.

Smart Agriculture & Feed Engineering Solutions

Taiwan-based, Asia-focused

Company Overview

AgriAsia Development Co., Ltd., founded in **1974**, is a leading agent for advanced processing equipment serving the livestock, aquaculture, and pet food industries.

1

Market Position

Agricultural engineering integration specialist delivering comprehensive feed processing solutions by integrating global technologies, ensuring efficiency, reliability, and long-term value for our clients.

2

Vision

Introduce the **world's best agricultural equipment** into **Asia**, enabling industry upgrades while ensuring long-lasting solutions that can be sustained and passed on to future generations.

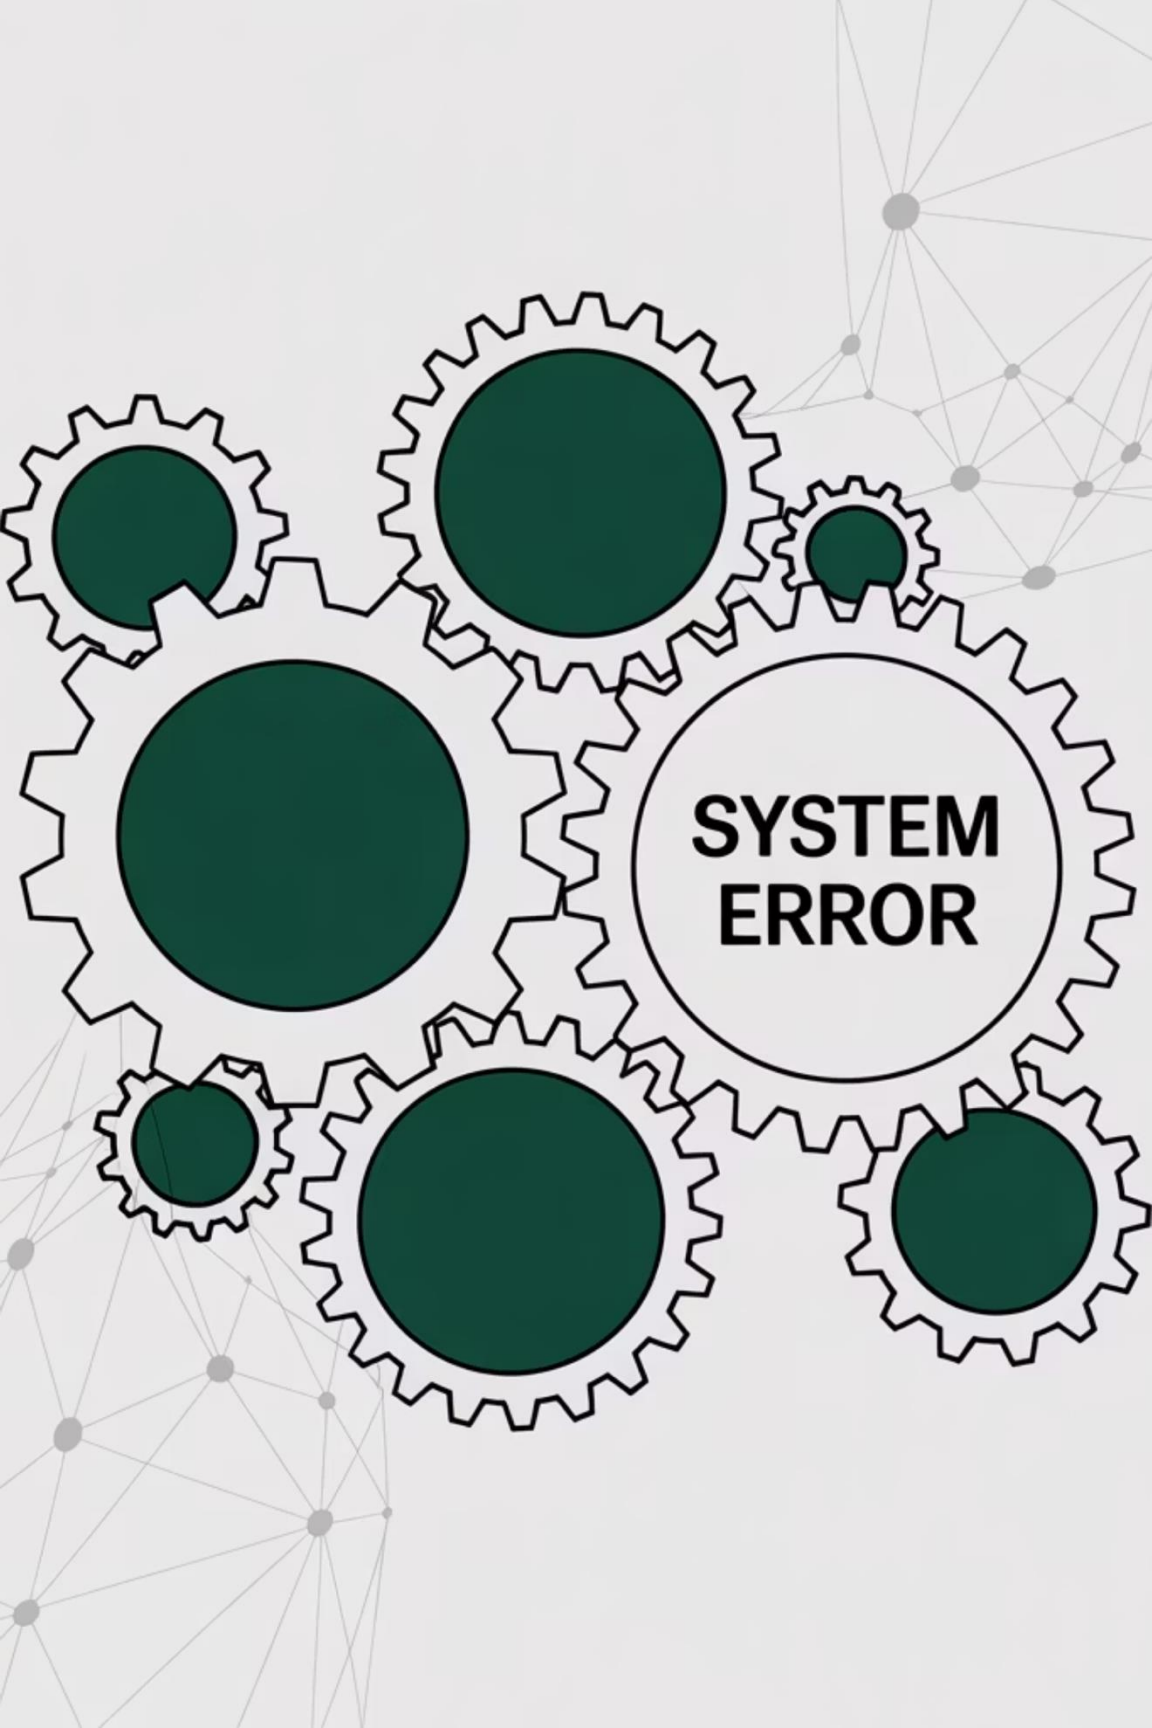

3

Core Values

Innovation-driven solutions – Delivering advanced agricultural engineering solutions powered by global leading technologies.

Trusted partnerships – Building long-term, reliable relationships that ensure project success and customer satisfaction.

Global collaboration network – Connecting Asia with the world's top agricultural equipment providers for sustainable industry growth.

Industry Pain Points

Operational Challenges

- Low production efficiency rates
- Significant raw material wastage
- High downtime risks

System Integration Issues

Many facilities lack comprehensive design coordination between different equipment systems, leading to suboptimal performance and increased operational costs.

Our Solutions & Value Proposition

Consultative Design

Comprehensive assessment and customised engineering solutions tailored to specific operational requirements.

Full Process Integration

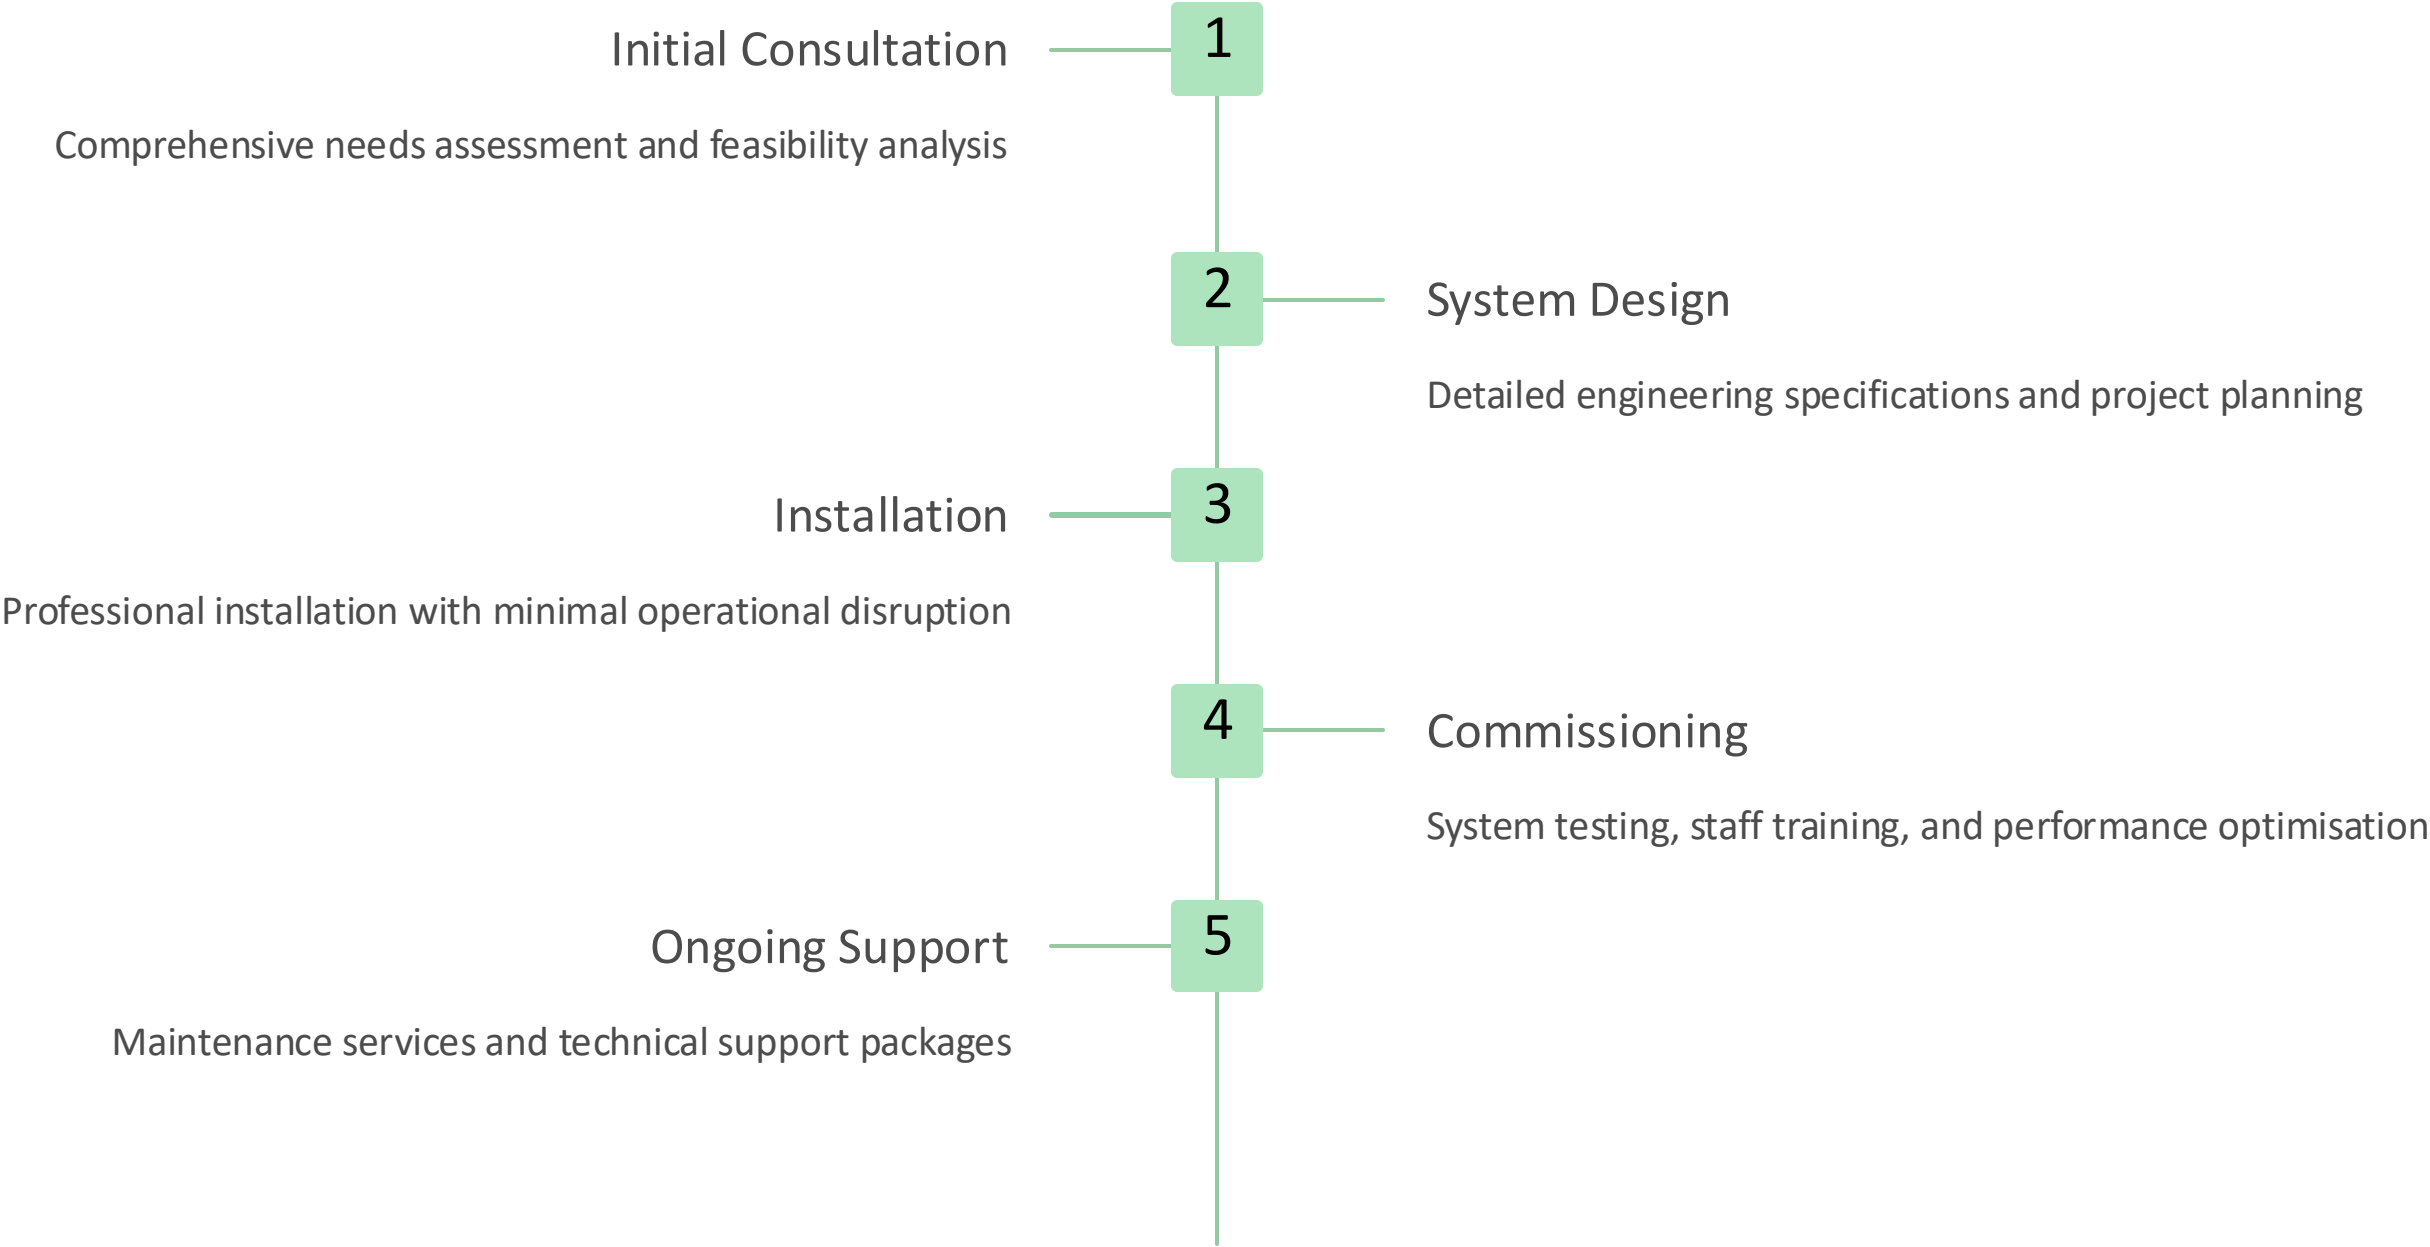

End-to-end implementation ensuring seamless system coordination and optimal workflow efficiency.

Automated Energy Solutions

Smart automation systems delivering significant energy savings and consistent quality improvements.

Project Management Excellence

Feed Processing Line

1

Raw Material Reception

Carter Day (Pre-cleaning / Fine cleaning / Destoning Destoning & Metal Protection) - Raw material material cleaning and coarse separation

2

Raw Material Storage

Behlen (Good flowability grain silos), **Tank Connection** (Special/difficult-to-flow material tanks), monitoring and ventilation systems - Storage quality and scalability, selection based on flowability to prevent deterioration and corrosion

3

Storage Discharge

Vibrafloor (stable discharge), **Laidig** (arch-breaking/difficult material discharge), conveying conveying interfaces - Continuous, controlled discharge with reduced residue and manual handling

[Learn more our solutions](#)

Feed Processing Line

4

Grinding

Carter Day Hammermill, **KAHL** Rollermill - Particle size and shape critical for downstream downstream quality

5

Mixing

Scott Equipment Horizontal paddle and ribbon ribbon design, short mixing time (30-120 seconds) High uniformity mixing ($CV \leq 5\%$)

6

From Conditioning to Coating

Kahl – Hydrothermal conditioning (stable steam steam supply, starch gelatinization, improved digestibility), Expander (high-pressure steam and and shear for fiber breakdown, improved flow and flow and pelletability), Pellet Mill (flat-die press for press for uniform and durable pellets, energy-energy-efficient with flexible die change), Vacuum Vacuum Coater (horizontal drum design, precise precise liquid/powder dosing, deep coating for for aquafeed, specialty feed and pet food).

[Learn more our solutions](#)

Trusted by Leading Clients

Biggest Feed Manufacturers in Taiwan

Large-scale feed production facilities requiring requiring integrated processing solutions

Grain Storage

Large-scale grain storage facilities requiring requiring efficient handling and preservation preservation systems

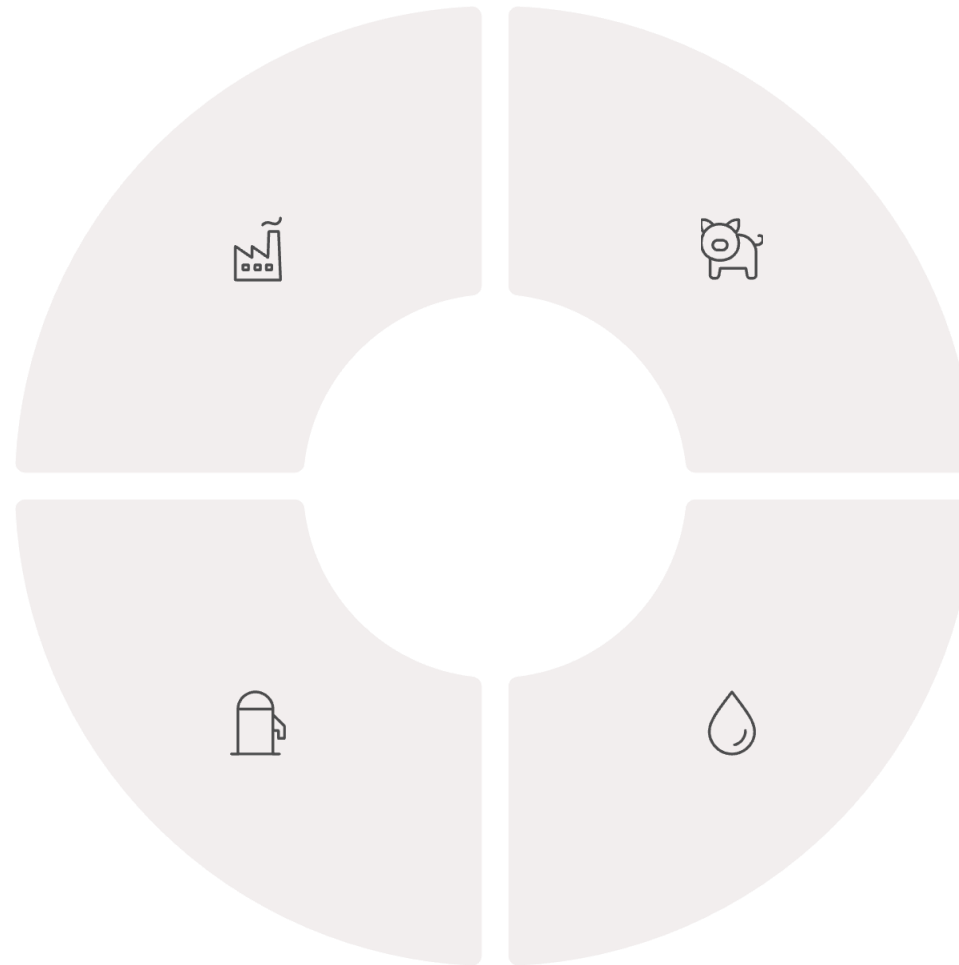

Smart Farming Operations in The **Philippines**

Modern livestock facilities implementing automated feeding, monitoring, and environmental control systems

Biggest Oil Processing in Taiwan

Oil extraction facilities requiring precision equipment and quality assurance systems

Strategic Partnerships

Global Equipment Partners

pet foods, and aquatic feed

Our partnerships with leading international manufacturers ensure access to cutting-edge technology and comprehensive technical support for all projects.
for all projects.

Project Success Stories

100,000

Finisher per Year at Automated Pig Farm

10,000-head automated pig farm with smart weight grading system.

56,000T

3600x10+5000x4

the largest soybean storage facility in Taiwan.

100,000T

Rice Cold Storage

Rice cold storage portfolio exceeding 100,000 tons nationwide.

8x

Grinding System

Grinding system extended blade life from 1 month to 8 months, cutting downtime significantly.

1200+1200

GGP + GP Smart Pig Farm

1,200-head GGP smart pig farm with integrated 5,000-ton corn silo.

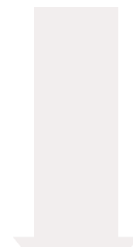

2x

Pelleting Lines

Pelleting lines doubled in production capacity and improved quality.

Market Expansion Plans

Technology Partnerships

Strategic alliances with leading agricultural technology companies for enhanced enhanced service offerings.

Southeast Asian Growth

Expanding operations across Southeast Asia — through local partnerships.

Education

Academic Collaboration

Partnerships with leading universities providing guest lectures and practical training programmes for the next generation of agricultural engineers.

Future Development Strategy

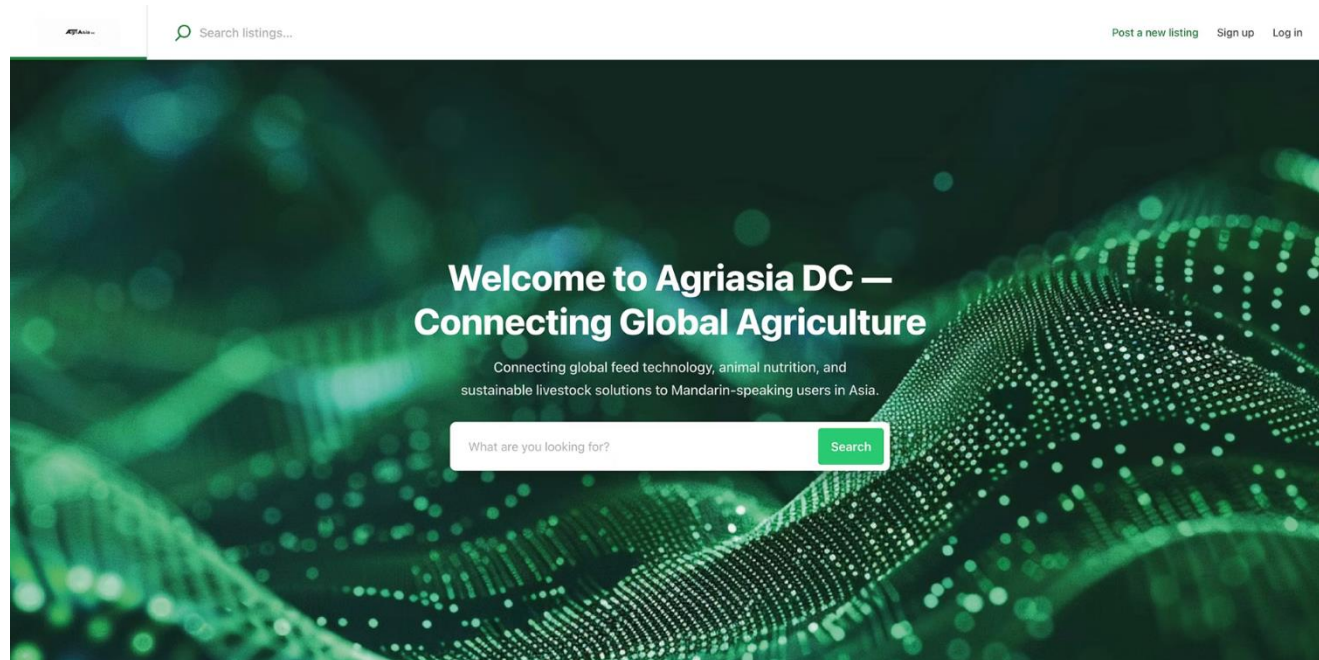

Education Platform

Comprehensive online learning portal for agricultural engineering professionals and students worldwide

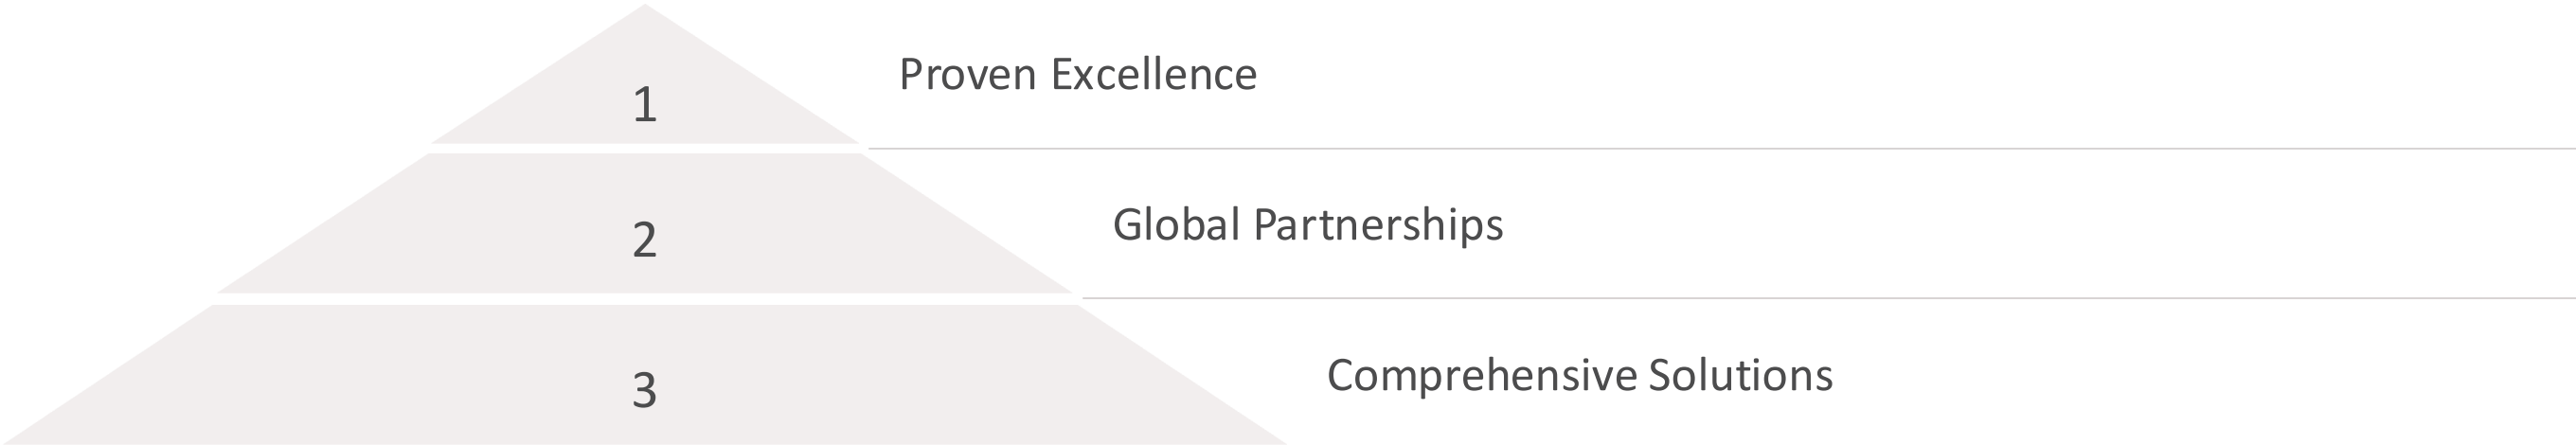

Marketing and E-commerce Platform

Digital marketplace connecting equipment suppliers, animal nutrition, feed nutrition, feed additives, across Asia

E-COMMERCE PLATFORM PROTOTYPE

Why Choose AgriAsia Development Corp.

Our unique combination of international partnerships, local market knowledge, and comprehensive service offerings makes us the preferred choice for agricultural engineering solutions across Asia-Pacific.
